Summary

Software Engineer specializing in developing high-performance, data-driven web applications in fast-paced startup environments. Skilled in React.js and with hands-on experience delivering scalable, API-driven systems and shipping impactful features from concept to production.

Skills

Languages: JavaScript, Typescript, C/C++

Frontend: HTML, CSS, React.js, Redux, Context API, Tailwind CSS, Next.js

Backend: Node.js, Express.js

Database: MongoDB

Tools: Git, GitHub, Postman, Figma

Core Concepts: REST APIs, Authentication (JWT), Data Structures & Algorithms

Experience

Wissen Research

Aug. 2024 – May. 2026

Software Engineer

Mohali, Punjab

- Developed and maintained React-based applications handling dynamic API data and complex user workflows.
- Built UI modules for patent analysis tools, including product search, claim visualization, and data-driven dashboards.
- Consumed and managed large structured datasets from REST APIs, ensuring efficient rendering and smooth user experience.
- Implemented authentication flows using JWT and TOTP-based verification for secure user access.
- Optimized state management using Redux and Context API to reduce unnecessary re-renders and improve performance.

InfoStride

Jan. 2024 – Jun. 2024

Software Developer Intern

Mohali, Punjab

- Contributed to MERN stack applications by developing frontend components and integrating backend APIs.
- Collaborated using Git and Jira for version control and task tracking. Translated Figma designs into responsive UI components.

Projects

YIP — Patent Infringement Analysis Platform

Tech: React.js, Redux, Tailwind CSS

- Developed frontend modules for an AI-assisted patent analysis platform to identify potential infringement cases.
- Built dynamic workflows for product search, reverse engineering, and claim chart visualization.
- Consumed and rendered complex patent data from REST APIs, handling large structured datasets.
- Implemented Redux for centralized state management, improving performance and reducing unnecessary re-renders.
- Designed reusable and responsive UI components for scalable frontend development.

OGEx — Patent Data Analysis & Taxonomy Tool

Tech: React.js, Redux, Tailwind CSS

- Developed frontend features for a patent data analysis tool displaying insights from Excel-based datasets.
- Implemented file upload UI and handled parsed data from backend APIs for dynamic table rendering.
- Built interactive tables with filtering, tagging, and export functionality for efficient data exploration.
- Managed large datasets using pagination and optimized state updates with Redux to ensure consistent and scalable state management.
- Designed reusable components for complex, data-driven UI workflows.

AI Resume Analyzer

Tech: React.js, Redux, Tailwind CSS, Node.js, Express.js, MongoDB, GenAI

This project is designed users can upload their resumes, analyze job descriptions, detect skill gaps, and generate AI-powered interview questions and ATS-optimized resumes.

Education

GURU NANAK DEV UNIVERSITY, AMRITSAR

Aug. 2020 – July 2024

Bachelor of Technology in Computer Science and Engineering (CGPA 7.86)

Amritsar, Punjab

Achievements

- Solved 300+ DSA problems across platforms like LeetCode, codestudio and GeeksforGeeks, covering arrays, strings, recursion, and basic dynamic programming
